

CHILDREN 18MOS TO 4 YEARS OLD & THEIR PARENTS NEEDED FOR STUDY ON AUTISM

WHAT ARE THE GOALS?

The goal of this research study is to design a test that will help identify differences among children with autism, children with developmental delays and typically developing children.

WHAT WILL PARTICIPANTS BE ASKED TO DO?

- Make one or two visits to CHOP
- Children will complete psychological testing and provide a DNA sample
- Parents will be asked to provide information on their own medical histories
- Participants will be compensated for their time
